PROFESSIONAL SUMMARY

Product-focused UI/UX Designer and Frontend Engineer in training with hands-on experience designing and optimizing enterprise workflows, particularly within Oracle HCM environments.

Skilled in translating complex business requirements into intuitive user experiences while building a strong foundation in JavaScript, frontend architecture, and system design. Currently expanding into full product engineering by combining UX thinking, frontend development, and backend awareness (SQL, APIs, and data structures).

Passionate about building scalable, user-centered digital products and continuously improving through real-world projects, including a multi-tenant SaaS application.

EDUCATION & LEARNING

AltSchool Africa (In Progress)

Frontend Development Diploma

- JavaScript, frontend architecture, and modern web development practices

UXL School of Design - October 2023

User Experience (UX) Certification

- Interaction design, usability, information architecture

Google UX Design – May 2023

Foundations of User Experience (UX) Design Certification

- User-centered design, research, wireframing, prototyping

Utiva – November 2022

UI/UX Design Certification

- Practical UI design, user flows, Figma

Obafemi Awolowo University – May 2019

B.Sc. Sociology and Anthropology

- Human behavior, research methods, data interpretation
- Foundation for user research and product thinking

PROFESSIONAL EXPERIENCE

Oracle HCM Techno-Functional Consultant

Heirs Technologies | *June 2025 - Present*

- Designed and optimized workflows within Oracle HCM (Core HR, Recruitment, Journey, Org Charts)
- Improved usability of HR processes by aligning system functionality with user needs
- Collaborated with stakeholders to translate business requirements into functional solutions
- Supported system configuration and testing for improved user experience

Key Impact:

- Improved clarity and efficiency of HR workflows
- Bridged gap between business users and system implementation

Product UI/UX Designer

Plexada System Integrations Ltd | *February 2023 – September 2025*

- Led end-to-end product design across multiple client projects, from user research and discovery to high-fidelity UI
- Designed and delivered user-centered MVPs that support product validation and investor readiness
- Collaborated with cross-functional teams to translate business requirements into scalable digital solutions
- Conducted usability testing and applied feedback to improve product functionality and user experience
- Bridged the gap between design and frontend implementation, ensuring design feasibility and consistency

Key Impact:

- Delivered scalable, user-focused products aligned with business goals
- Improved usability and user interaction across multiple applications

PROJECT

WorkshopOs

Multi-Tenant SaaS Application (In Progress)

- Designing a multi-tenant workshop management system with role-based access
- Structured architecture:
 - Database → Backend (planned APIs) → Frontend
- Created relational database schema:
 - Workshops → Branches → Users (one-to-many relationships)
- Implemented database using Supabase

- Developing frontend using native JavaScript + Tailwind CSS
- Designed onboarding experience with focus on:
 - Reduced cognitive load
 - Clear user flows
 - System-driven UX

Key Learning:

- Backend architecture directly impacts frontend UX
- Transitioning from UI design to full product/system thinking

SKILLS

- **Product & UX:**
UI/UX Design • User Flows • Wireframing • Prototyping (Figma) • Usability • Accessibility • Enterprise UX
- **Frontend Development:**
HTML • CSS • JavaScript • Tailwind CSS • Responsive Design • Component-Based UI
- **Product Engineering:**
System Thinking • Multi-Tenant Architecture • Role-Based Access • API Concepts
- **Database & Backend:**
SQL Fundamentals • Database Design • One-to-Many Relationships • Supabase
- **Tools:**
Figma • VS Code • GitHub • Vercel • dbdiagram.io • Supabase
